*Hollie*  
Guard

HollieGuard is a personal safety app for those facing domestic violence, stalking, or harassment, and anyone seeking peace of mind when travelling alone. Simply shaking your phone raises alerts to emergency contacts and a 24/7 police-approved monitoring centre, ensuring you get the help you need anytime, anywhere.

## App Overview

### Alerts

HollieGuard allows you to swiftly raise an alert and provides a 24/7 monitoring service on standby to escalate alerts giving you greater peace of mind.

### Evidence Capturing

When an alert is raised, your phone immediately begins capturing audio and visual evidence on the cloud. The evidence is sent to your emergency contacts and the police approved monitoring service to assess your situation so that emergency services can be dispatched to your location if deemed unsafe or in immediate danger.

### 24/7 Monitoring

With HollieGuard Extra, your alerts are monitored by a police approved monitoring centre 24 hours a day, giving you peace of mind all day and night, wherever you are.

### Journey

Ensures users travel with confidence by providing designated emergency contacts with real-time updates of their movements as they travel between two places confirming they arrive safe or trigger a panic alarm if they don't.

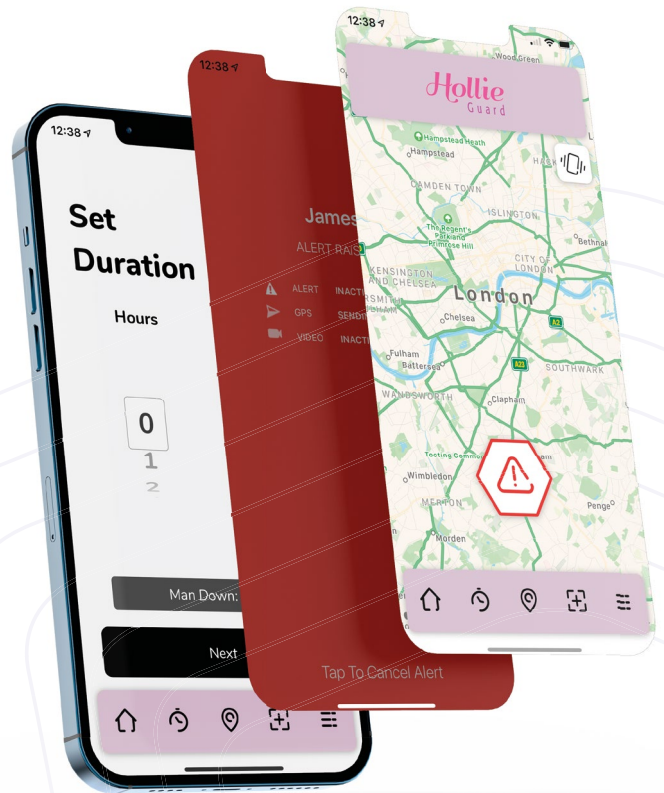

### Meeting

This feature can be used in situations when going to unfamiliar areas, meeting someone new or working alone. The meeting timer can be set around the user's event. An alert will automatically be created if the timer expires, or if users do not cancel the meeting.

### Duress Pin

Where users have the ability under duress situations to signal for help, quickly and silently when it may be difficult to call for assistance.

### Incident Detection

This feature provides an extra level of protection to users by detecting impact if the user is attacked or injured, and non-movement if the user is immobilised at the scene.

### Mask Mode

As an added layer of security, you can transform your hollieguard app icon on your phone home screen to a calculator or weather app to disguise the Hollie Guard App appearance.
